AB The present invention is directed to a method of reducing intraocular pressure. The method comprises administering to a subject a pharmaceutical compn. comprising an effective amt. of a nucleotide 5'-pyrophosphate pyranoside or analogs I wherein X1 is independently O, NR1, S, CF2, CF3, CN, bond; X2 is H, halogen, CN, ether, thioether, amine, CF3, alkyl, cycloalkyl, arylalkyl, aryl, arylalkenyl, arylalkynyl, acyl,

ester, amide, heterocycle; X3 is H, CN, ether, thioether, amine, CF3, alkyl, cycloalkyl, acyl, ester, amide arylalkyl, aryl, arylalkenyl, arylalkynyl, heterocycle; R is H, alkyl, cycloalkyl, arylalkyl, aryl, heterocycle, acyl, ester, amide; R1 is H, ether, alkyl, cycloalkyl, arylalkyl, aryl, acyl, ester, amide; E is O, CH2; E1, E2 are independently H, F; E1E2 together are C-C bond; Y1 and Y2 are independently O, F, with the proviso that when Y1 and Y2 are F, then M1 and M2 are absent; M1 and M2 are independently H, alkyl, cycloalkyl, arylalkyl, acyl, ester, amide; Z is O, substituted nitrogen, CH2, CHF, CF2, CCl2, CHCl; Z1 and Z2 are independently O, S; Q is heterocycle, sugar residue. The method of the present invention is useful in the treatment or prevention of ocular hypertension, such as found in **glaucoma**, including primary and secondary **glaucoma**. The method can be used alone to reduce intraocular pressure. The method can also be used in conjunction with another therapeutic agent or adjunctive therapy commonly used to treat **glaucoma** to enhance the therapeutic effect of reducing the intraocular pressure. The present invention also provides a novel compn. comprising a nucleotide 5'-pyrophosphate pyranoside or analogs. The action of UDP-.alpha.-D-glucose (II) on intraocular pressure (IOP) was assessed in New Zealand white rabbits. Effect of II produced a time-dependent redn. in IOP, which was maximal from 0.5 to 5 h with a redn. of 26% (n=4). This lowering of intraocular pressure in rabbits by II demonstrates the utility of UDP-.alpha.-D-glucose for treating ocular hypertension and **glaucoma**.

AB The prodn. of sugar nucleotide-synthesizing enzymes (nucleotidyltransferases or pyrophosphorylases) from nonparasitic protists and their use for the prodn. of sugar nucleotides are claimed. These enzymes allow the elimination or simplification of expensive preliminary steps in the manuf. of sugar nucleotides such as GDP-fucose, GDP-mannose, UDP-glucose, UDP-galactose, UDP-galactosamine, UDP-N-acetylglucosamine, and UDP-N-acetylgalactosamine.

AB The present invention is directed to a method of reducing intraocular pressure. The method comprises administering to a subject a pharmaceutical composition comprising an effective amount of a nucleoside 5'-pyrophosphate pyranoside or analogue, which is defined by general Formula I. The method of the present invention is useful in the treatment or prevention of ocular hypertension, such as found in **glaucoma**, including primary and secondary **glaucoma**. The method can be used alone to reduce intraocular pressure. The method can also be used in conjunction with another therapeutic agent or adjunctive therapy commonly used to treat **glaucoma** to enhance the therapeutic effect of reducing the intraocular pressure. The present invention also provides a novel composition comprising a nucleoside 5'-pyrophosphate pyranoside or analogues.

CAS INDEXING IS AVAILABLE FOR THIS PATENT.

AB The present invention relates to nucleotide-sugar-synthesizing enzymes (enzymes with nucleotidyltransferase or pyrophosphorylase activity) from nonparasitic protists, to a process for the preparation thereof and to the use thereof for preparing nucleotide-sugars. The enzymes according to the invention make possible or greatly simplify the enzymatic preparation of various nucleotide-sugars on the industrial scale from low-cost precursors. It is possible with the aid of the discovered enzymes to prepare, for example, GDP-fucose, GDP-mannose, UDP-glucose, UDP-glucosamine, UDP-galactose, UDP-galactosamine, UDP-N-acetylglucosamine and UDP-N-acetylgalactosamine in economic quantities.
